QUALITY POLICIES

The Quality Policy is the basis of the Organizational rules of our Company and is drawn up in compliance with the Quality Management System.

Our ideas, our actions and our training are focused on customer satisfaction and respect for the environment in which we operate. Our success depends on achieving process objectives and seeking continuous improvement. We consider and track all risks and opportunities: risk assessment is vitally important to be ready to face all possible adversities to which we may be exposed, especially in the era in which we live with great climate changes and catastrophes.

Our Vision gives great emphasis and impetus to the awareness of the importance of social commitment towards people and the territory, sustainability and environmental protection.

All areas of our organization are committed to realizing and pursuing these objectives, acting with Integrity, out of their own personal conviction, and with a Spirit of responsibility towards the Company itself. CMP's integrity is the basis of competitiveness, and represents the foundation of CMP's sustainable growth, the way to continuously build and confirm our reputation as a Company that customers, workforce and stakeholders can trust and which they can count.

The concept of Integrity includes the firmness of upholding the right principles regardless of emotional, economic and social pressures both in carrying out the Company's activities and, it is reiterated, paying particular attention to the problems of the Environment and the Security of the territory that surrounds us .

MDQ - Attachment 2

CMP's Quality Policy is developed in several points, taking the 10 Principles of the UN Global Compact as a guide:

- CMP promotes and respects universally recognized human rights within their respective spheres of influence.
 - CMP ensures that it is not, even indirectly, complicit in the abuse of human rights.
- CMP supports workers' freedom of association and recognize the right to collective bargaining; believes in the elimination of all forms of forced and compulsory labor, in the elimination of child labor and in the elimination of all forms of discrimination in employment and profession. • CMP promotes and undertakes initiatives for greater environmental responsibility and encourages the development and diffusion of technologies that respect the environment.
- CMP is committed to fighting corruption in all its forms, including extortion and bribery.

CMP, in order to promote an ecologically and socially sustainable policy, uses energy exclusively from renewable sources, in order to protect the environment while remaining fully efficient.

All Employees think and act as part of the processes and therefore, within the scope of their responsibilities and in compliance with the Company's guiding principles, are committed to achieving the company objectives.
